## Done with google

Randomly last night my buds are no longer recognized as Google buds. It legit happens half way through a song. I've done every possible reset in the app, settings and the buds themselves. They won't even access the Google app, it just keeps pushing me to the Bluetooth section. Google support is useless as I'm in Canada and you can't purchase replacement cases only buds in Canada

That might just be u? I don't feel that sentiment AT ALL

**[deleted]** OP • 16d ago

Dude it is most definitely not me. More than 100 users daily will come on the subreddit and complain that the update has done something bad to their phone. Monthly updates should
