Google search bar

Did Google change the search bar functionality? If you search for anything from homescreen, it's giving me Google search results and not my device contacts or apps.

Whereas if i search from the appdrawer it's works as usual..? WTF did Google do or did I mess with the settings unknowingly?

Today my P7 got it too. It looks so bad, just a plain background with a bunch of apps. I want the device search feature back, like ASAP. It's ruining the whole experience of the home screen.

Just checked, mine does but the web search part takes up so much space you have to scroll down a bit for the contacts.

Can confirm, contacts are all the way at the bottom.

Yeah, it appears they changed something. Apps still show up for me in a horizontal row at the top, but no contacts or system settings show up if I search them.

It also lacks the "Frosty" blur effect of Material 3 Expressive that it used to have, and now it's just white. It looks very similar to the Google app search widget in that regard.

Maybe an update to the Google app changed something. I know the Google app is connected to the home screen Pixel search bar in some way, because you can turn off the "AI Mode" button in the Pixel search bar through the Google app. I also run the beta version of the Google app, so I know bugs are expected sometimes

It should've been left as-is. It's totally ruining the experience now. I was happy about the dec update and now this.

Pixel 10 Pro XL

I assume it's a glitch and I just haven't fixed it yet. It would make no sense for them to do it on purpose because it doesn't match material. 3 expressive at all

**Much-Selection-1691** **OP** • 2mo ago

Pixel 6a

I hope it's a glitch.

**Dependent_Hat_4772** • 2mo ago

It is 100% a bug, it landed on my pixel too this morning. It is just the normal plain google search page from within the app like back in the day 2018 on the pixels. I just hope it gets fixed soon. Like today ish soon. It ruins the user experience massively.

**Much-Selection-1691** **OP** • 2mo ago

Pixel 6a

It's a super massive bummer imo. Looks too bad now. 🙄

Pixel 8

Another thread has a comment suggesting this is on purpose and not a bug

**razoract** • 2mo ago

Hope it isn't on purpose. Makes no sense from a user standpoint and it has been posted as a bug on tech news.

**Tim70** • 2mo ago

Pixel 1->Pixel 4 XL->

yeah its awful

**the_assault_penguin** • 2mo ago

Yep, it changed for me too on P10! I hate it. The universal search was so good 🙄

Always been like this, web results take up a lot of space

stefanreddit13 • 2mo ago

Pixel 8

Same for me somehow

FreeRedneckKiss • 2mo ago

Same issue here

Mercurial_Miracle • 2mo ago

Also experiencing this..

chonch_ua • 2mo ago

Is there any way to revert it ?

Much-Selection-1691 OP • 2mo ago

Pixel 6a

No. At this point, I think it's intentional by Google.

chonch_ua • 2mo ago

I hope they will return back or add an option to disable this search bar, completely useless now

Much-Selection-1691 OP • 2mo ago

Pixel 6a

Fingers crossed.
