Props to Google fixing things

Maybe I just want good karma after posting negativity around the pixel 10 series but I wanted to give google some props to rolling out fixes for it pretty quick.

- They did a fuzzy screen fix.
- They fixed my Google wallet issue of requiring verification when I turned that off.
- They fixed a massive pixel camera battery drain.

Now I'm just hoping they fix the excessive battery drain particularly around background app usage and we will be cooking. Thanks Google.

If you all have noticed things Google have fixed since the launch, feel free to post it here and show some love.

Be nice if they fixed the weather info going AWOL whenever it fancies from At a Glance too!

JosefTor7 OP • 5mo ago

I will say I know what caused my weather to go AWOL from the at a glance. The only way weather shows up is if you allow the location permission to be all the time and turn on precise. I hate this as the app misuses this permission and requests location too much. Also, why would a weather app need precise data anyway and why can't I just manually specify my location and be done with it. Poorly designed app.

for a few hours, in my situation 🤔

[Location aettings](#)

SkySplitterSerath • 5mo ago

It worked fine for 3 years on my Pixel 7, only broke the last week on my 10 Pro. I changed nothing.

Melbuf • 5mo ago

Pixel 9 Pro

Yea that didn't fix anything for me. Hell even having an actual weather widget doesn't always work and I get " weather not available" all the time

SSDeemer • 5mo ago

Top 1% Commenter

Weather can change quickly, and people move around. I would hate to have to change my location manually every time I want to check the weather. As to accuracy, a few weeks ago, there was a torrential downpour about a mile from my house, where the sky was clear and the sun was shining.

...why can't I just manually specify my location and be done with it.

You **can** set individual locations for the Pixel Weather app from ATAG, and these work even if location is disabled. For example, I am currently in Georgia, where it's raining and 71; in Greensboro, NC it's 70 and drizzly; In Istanbul, Türkiye it's mostly cloudy and 67.

I have no idea what you mean by "requests location too much." I just checked, and perhaps it's because I am not moving, but it appears that the app polls for location no more frequently than every 20 minutes, unless I click on weather in ATAG to bring up current conditions. During the past 20 minutes, it has rained, the sun came out, and then it started raining again, with some thunder.

In summary, everything that you wrote is wrong. Try spending a little time learning out an app actually works before saying it is poorly designed.

Pixel 9 Pro XL

I thought it was me going nuts. The weather shows up randomly now with at a glance. Sometimes it's there, sometimes it's just like nope! This started right after the last security update or possibly the last Google play update. I still have the continuous notification in the system tray, but at a glance now, I would say it works maybe 40% of the time. I didn't change anything it just started to randomly disappear.

DMeisterDan • 5mo ago

Google needs to release a statement about this: "It's not you, it's me!"

[Skip to main content](#)

Create

It looks as though it may be an issue with the Google app which received an update at the same time this issue started being this bad but that could just be coincidence. Either way it's not an issue with your specific device it is an issue with Google's app, system files or their servers.

Make sure you report it though - the best way to get Google to fix something is to rub their faces in it!

System -> About Phone -> Send feedback about this device

**TheIndulgencers** • 5mo ago

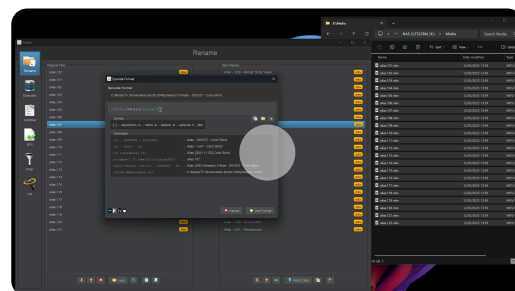

It would be nice if they released products that weren't glorified prototypes on beta software for \$1k+ but whatever.

**One_Doubt_75** • 5mo ago

I've owned pixels for a few years now, it never feels like the software is finished. Just constantly having things added or tweaked which causes random bugs here and there.

FileBot is the ultimate tool for renaming and organizing your movies, TV shows and Anime. Match and rename media files against online databases, download artwork and cover images, fetch subtitles, write metadata, and more, all at once in matter of seconds. It's smart and just works.

[Download](#)filebot.net**Any_Campaign8463** • 5mo ago

Bro my alarm is not firing after the new update 🤡🤡🤡🤡 I missed my exam

**-peas-** • 5mo ago

every mf still need one of these. never gets software updates so it can't randomly not fire, backup battery even if your power is out, and will work for 100 years.

Thanking for fixing bugs/issues that shouldn't even came out?

I mean they are just doing what is expected on a premium priced device...

I like pixel phones but please let's not keep our standards low.

**mr-right-now** • 5mo ago

Pixel 10 Pro

Yeah let's keep pretending iPhones are flawless devices for their price point too...

**Jumpy_Tap9148** • 4mo ago

Pixel 10 Pro XL

God forbid someone say Apple devices have flaws lol.

I had 3 iPhones and all 3 had some issues with the screen not being responsive. iOS may be more stable than most Androids but it is not the best OS.

Pixel 10 Pro

No one hates Pixel phones more than [r/GooglePixel](#)

**SnooLentils2712** • 4mo ago

This 🍌🍌🍌🍌 We pixel users are very used to being given crumbs when we pay for expensive flagships.

**Longjumping_Door_147** • 5mo ago

Have the videos been optimized, or do they still suffer from jittering when the light starts to fade?

And most importantly? Have they fixed the OIS behavior? The videos are all shaky.

Pixel 9 Pro XL

they should probably have done it *before* the release of the phone, an A for effort i guess

**yogendra1911** • 5mo ago

I mean those are supposed to work out of the box. What is their QA team doing?

Not fixing would get further negativity to them in the already competitive market for high end devices!

**Worldly_Letterhead_4** • 5mo ago

Have they fixed the wifi connectivity issues yet?

**loanme20** • 5mo ago

The phone app needs to be rolled back. It's sooooo bad.

Favorites are tiny

Call Log became the focal point.

Speaker phone is on a delay

The phone app should not be able to rotate.

**TheBareRomantic** • 5mo ago

Im hoping they fix gps, until then Im stuck with my iphone 🙄

**JosefTor7** OP • 5mo ago

Yeah, I am so tired of the "I left the route" repeating a trillion times because the location isn't accurate.

They still need to fix the finger print with a screen protector, witch sucks !

**SSDeemer** • 5mo ago

Top 1% Commenter

Which Pixel? I had a 6a, for which fingerprint recognition mostly worked, but occasionally didn't. Six weeks ago, I got a 9a, and the screen fingerprint reader as been as reliable as the back of case one on my old 4a.

**ErvinMarec** • 4mo ago

Pixel 10 pro xl !

**Jalan** • 5mo ago

Get name brand screen protectors

**ErvinMarec** • 5mo ago

I purchased Spigen and an cheeper brand both the same ? And don't tell me Spigen is making crap shit ,when all my typing letters works on same screen protector!

**ErvinMarec** • 4mo ago

Spigen it's a brand I had them from years on my phone even on my pixel 8 pro ! They worked flawless so please spare me ,they have issues!

**Jaded_Page_3273** • 4mo ago

10 Pro and Spigen glass, and fingerprint recognition is working flawlessly here.

**Digs31789** • 5mo ago

Predictive battery times are now bugged. For every bug they fix, a new one is introduced

**ajnord** • 5mo ago

Over time these issues will be addressed and resolutions just need a bit of patience instead of being so reactionary and bashing the product. Have a nice day. 🙄

**PlayfulTop7569** • 4mo ago

I've had every pixel since the 2xl. My 7, 9 and now 10 pro have been BUGGY and when one problem gets fixed 3 others show up. Folks are not being reactionary, there is something going on with these newer models. Good for you if you haven't experienced them.

**acid-burn2k3** • 5mo ago

And I'm here pixel 10 pro XL since day 1 :

1. No fix needed, around 12h SoT
2. Some days I even don't charge it.
3. Excellent performance in game
4. No overheating
5. Love the photos high res mode.
6. Love the ecosystem (coming from iphone)
7. It's snappy, fast, reliable.
8. My wallet has been setup day one and is still doing fine, 0 issues there

Maybe stop installing malwares apps instead of complaining. Fix the user not the phone 🙄 I just can't believe people have issue with this fucking triple A perfect phone but well

**eragon233** • 5mo ago

Pixel 9 Pro XL

Fixed massive battery drain in camera? My phone is draining 20-30% with about 30min of camera use and some video recording.

**JosefTor7** OP • 5mo ago

You may want to check the app store manually for pixel camera as sometimes the update doesn't show up under the update screen.

**Lonewolf2nd** • 5mo ago

Is that all they fixed? They really need to step up. But it is progress I guess

**AK16ZZZ** • 5mo ago

**Owen96_** • 5mo ago

They still haven't fixed the wallet issue for me. My phone is updated, how did you get it to work?

**JosefTor7** OP • 5mo ago

Well, the wallet issue of adding cards is probably not fixed. The issue of having to open wallet, click verify and verify before tapping appears to be fixed. Granted, I still believe you have to open the wallet app unlike before where you could be anywhere and just tap and have it work which is superior for people who don't need extra security.

**mtbaird5687** • 5mo ago

What was the Google wallet issue?

**JosefTor7** OP • 5mo ago

Well, some people can't add cards. I don't know if this is fixed. For me, when I upgraded to the pixel 10 pro, even though I had verification turned off, it would force me to open the app, click verification and verify before I could tap to pay. This was quite the change from before where I would tap my phone regardless of which app I had open and as long as the phone was unlocked it would work. Now the verification is gone if you turn it off. You still need the app open which sucks but it is a start.

**mtbaird5687** • 5mo ago

Ah interesting

**notoriouslush** • 5mo ago

Why is the unlock so slow now after an update? Like the last button takes like 5 seconds it feels like. It's so laggy

**jjochimmochi** • 5mo ago

They fixed a massive pixel camera battery drain.

Is this coming to Pixel 9 too?

Create

**wildwood8722** • 5mo ago

Well no props to Google for not fixing things here pixel 8 fold started on Android 14 it was really not designed for a fold so it was clunky Android 15 made the phone so wonderful it was like night and day between 14 and 15 now with Android 16 we're back to the days of Android 14 I don't know what the hell they did but it's not done well they changed everything they say oh you can customize it no I really can't customize anything I'm very limited on my text sizes on my icon sizes on my colors come on Google I use a pixel because I like to have choices if you want me to become a drone you're not going to win it's better products out there for the drone folks

**FnkyOlfrt** • 4mo ago

I'm happy for you that they fixed things you were concerned about. Perhaps selfish of me, but I'm still waiting for them to revert to the previous photo editor because the new version is an abomination!!

**gloworm62** • 4mo ago

I don't like the new version either , so I uninstalled and went back to an older version . Just have to put up with being told there is a new update and you're missing out every time you open the app .
