10 Pro battery has been bad ever since the November update. Anyone else experiencing this?

**IBlaze42** • 2mo ago

Someone was advising to clear the cache of the Google App, same with Connectivity Services.

Didn't believe it, but hey, why not.

[Skip to main content](#)[Create](#)

So. Cleared both those caches.

Currently 2 hours SoT. 87% battery. (10 Pro, December update)

Drain seems lowered. Any time I picked the phone since this morning, I was expecting it to drop at least 1 or 2% more. Every time.

I don't know if there was some garbage in the cache but... Well.

You may just try it.

The person advises to completely clear the Google app. Personally I just cleared the cache and it seemed to work.

I disabled Adaptive Connectivity, after I saw the number of services associated with it...

Preferred the dev option, more akin to what I had on OnePlus. (Basically it's supposed to cut Mobile Data if you're connected to WiFi)

Don't know why the clear cache trick isn't pinned somewhere, or more popular.

papadrach • 2mo ago

Top 1% Commenter

Going to try and clear cache on bunch of servers and apps. Hope this works. Thank you

IBlaze42 • 2mo ago

Sure, keep us updated, any feedback is welcome honestly

You may want to try the Developer option mentioned too

Don't know if it's only from December update, the option, or both, but until now, I usually had more consumption from mobile network than WiFi, despite being always connected to WiFi

Not this time. Just checked : 20% from WiFi, 9% from mobile network. It was usually the other way around.

And after all that, maybe try a Reboot + full charge and you should be good to go 😊

papadrach • 2mo ago

Top 1% Commenter

Ya I turned off Adaptive Connectivity and already have the mobile network always on "disabled" since I got the phone. After all the cache clearing, gonna turn off, recharge, and try it out again.

IBlaze42 • 2mo ago

[Skip to main content](#)

but unable to connect, and even if connected to 5G, I have better bandwidth and less response time on 4G where I live anyway 😄)

**papadrach** • 2mo ago

Top 1% Commenter

I disabled 5G as well! I did it on my P8 when I had one because it was legit on fire when I scrolled reddit for like 5 mins during a dr office visit in waiting room. Did it asap on my P9P and my S25U and have 0 issues. Definitely recommend that.

**IrrelephantNo9** • 2mo ago

P10 Pro here. Battery life was suddenly dropping like crazy after last update. Clearing the cache and turning off Adaptive Connectivity made a huge difference for me. Thank you for sharing!

**RunningInCali** • 2mo ago

Yes! I got updated on Saturday. My brand new Pixel Pro 10 has been draining ridiculously quickly since. Is there a fix?

**UncleCunk** • 2mo ago

Glad I'm not the only one.

**RunningInCali** • 2mo ago

I might contact Google later to see what they say.

**Which-Fudge4126** • 2mo ago

Same problem

**UncleCunk** • 2mo ago

Pixel 10 Pro too?

**Which-Fudge4126** • 2mo ago

Yes, searched everywhere for a fix, but nothing helped yet.

yep my battery has been draining like crazy. lmk if you guys find a fix

1 more reply

**ming3r** • 2mo ago

welp my pixel 10 pro is in the mail today, coming from pixel 9 pro. Already regretting it

**DancesWithKnives** • 2mo ago

I am . I can go to bed with an almost full battery and wake up to 20 - 10% . I've checked and done all the battery suggestions. Turned off background use for everything I could. Still it's getting ate up

**maxamillion17** • 2mo ago

This just happened to me today

**DancesWithKnives** • 2mo ago

I've started putting the standard battery saver on before bed and that's helped conserve the battery overnight.

**PourJarsInReservoirs** • 2mo ago

Pixel 10 Pro

Mine's been great even with typical weak signals that cause most drain. 6+ hours when limiting to 80%. Try scanning in background for BT and Wi-Fi and location precision off, fast switching between Wi-Fi and cellular off, cellular on all the time in dev options off, and manage apps that are power hogs unless you need notifications fast.

**CC-5576-05** • 2mo ago

Pixel 10 Pro

No change for me, I still get around 10 h of screen on time

**GoWithHer** • 2mo ago

Pixel 7

I hope this month's update will blow our Pixels!

**manukanawai** • 2mo ago

9 Pro here, having fairly extreme battery issue. The first time this happened I thought it was a fluke and I just wasn't paying close attention to the percent of battery remaining. The level went down to the point I saw the notification for the battery saver function turning on. I didn't look at my phone for a while and eventually realized it was dead in a much shorter time frame than I was expecting. No biggie. Except today I saw the battery saver function notification and literally watched the numbers decrease down to zero at a rate of about 1-2 every second. In under 10 seconds my phone went from 20% to 0 and powered down. I've never experienced anything like this before and am having difficulty finding any information on this problem, and hoping someone may heard or seen of something like this.

**papadrach** • 2mo ago

Top 1% Commenter

Same I'm ending my days now with like 10% left and maybe like 5 hrs SoT which isn't normal. Haven't had this issue in the longest of times with my P9P. Hope they fix excessive battery drain.

O have also the same battery problem, i wait for the new update....

**DancesWithKnives** • 2mo ago

I hope they fix this issue. This battery draining is extreme for such a new phone .

**sfcumguzzler** • 2mo ago

just noticed after getting the December update that my Pixel Stand 2's no longer work on my 10 fold. previously, they were fine (maybe a little finiky about exact placement), continuously charging the phone.

today, the phone begins charging, then stops and the little error light on the stand starts flashing...

:(

**retronican** • 2mo ago • Edited 2mo ago

Still no battery life fix. It took a dive on my 9a on the day I got the September update and hasn't been fixed since. I used to run until 55-60% now I'm down below 20% every day. Wasn't a gradual decline either -- it started draining quicker as soon as I installed that Sept. update.

**MN_mark_AZ** • 2mo ago

This is when my battery issues started too (9 pro). I went from 6-7 hours sot to maybe 2-3. I tried a factory reset too, but this didn't resolve my issues. I hate iOS but somehow I'm getting double the sot with about half the battery capacity

**Atomik_Roach** • 2mo ago

Pixel 8 Pro

Updated to December patch (BP4A.251205.006). Heavy battery drainage, All my apps are updated, phone was rebooted, cache was cleaned, I even let the phone discharge completely.

How's that ?

**[deleted]** • 2mo ago

Yeah good. Huge upgrade from a 7a. Got it bundled with a Watch 4 and Buds Pro 2 as well, but they haven't arrived yet.

[+ 1 more reply](#)**VHS_Action_86** • 2mo ago

I unfortunately feel like this update negatively affected my battery

**1997dodo** • 2mo ago

Pixel 10pro xl here who doesn't seem to get battery life issues. Just tested my battery life the past two days and managed to get 11hrs of screen on time. Admittedly this is with less than my usual cellular usage, usually I'm on data for 2-3 hours a day whereas these two days it was closer to 1-2 hours a day.

<https://imgur.com/a/RqkG XK0>

**furtiveraccoon** • 2mo ago

i didn't accept the november update until my phone started bitching about "security out of date"

and then once i did, battery life was immediately and noticeably worse. fuck this

[+ 3 more replies](#)**framingXjake** • 2mo ago

Have had excessive battery drain since September update and it has persisted every update since. I have tried everything, including a factory reset, and nothing has worked.

Side note, the factory reset and data restoration corrupted about a dozen or so photos of my late mother. I know it's my fault for not backing them up, but I'm still pretty irritated that all of this was a result of an issue created by bugged updates.

I don't think I'll ever buy another Pixel again. Not because of this particular issue, but because I can't trust Google to fix their mistakes when they happen.

[Skip to main content](#)[+ Create](#)**vaughn** • 2mo ago

TERRIBLE BATTERY LIFE: I switched to a Pixel 10 from a Pixel 7 two days ago. The reason for the switch is that my Pixel 7's battery life was terrible after 3 years. The phone would also get insanely hot sometimes (I thought this was the battery heating up) and Google Messages was not properly receiving RCS messages (half of them, especially from Apple devices, would just end up as "message not downloaded").

When setting up the Pixel 10, I chose a custom setup and selected almost everything to transfer over. The last 25% of the transfer took TWO HOURS (although the timer kept saying "8 minutes remaining" for most of that time).

At this point, it's losing 1% every few minutes when I do anything. As an example, in the last hour, I looked at IG for maybe 5 min, texted and received some texts and played one 4 minute YouTube video. The phone went from 75% to 66%.

Screenshots below. I should note that since the last 100% charge (showing as Monday), it's received a couple of one hour boosts from being connected to Android Auto while driving.

Taking the screenshots took me to 65%.

Here is a link to the screenshots: <https://imgur.com/a/TtVOLFO>

Hi! I'm considering switching from an iPhone 15 pro to a google pixel 9a. Mostly because I want a cheap way into the google pixel ecosystem and eventually into GrapheneOS (which I used in the past with the google pixel 4a and 5). I don't really know if it's a good choice, mostly because of the daily QoL things and the cameras. Thoughts? Should I switch? Should I buy it, test it for a day or two and see? Are there videos comparing iOS to google pixel OS? Thanks!

**jaz9999** • 2mo ago

10 Pro 256gb worth a try for £679?

Feel like I'm due an upgrade as I'm still on a base Pixel 6 but none of the new offerings any of the major companies seem particularly impressive

**BlackberryLumpy8732** • 2mo ago

How's the new update doing on Pixel 8a? (Just got it, waiting to get wifi back to download it and run it)

**Argonator** • 2mo ago

Are the vertical line issues with Pixels fixed on newer batches? I just bought a 9 Pro XL a few days ago and am worried since the Pixel isn't officially sold here (Qatar) so sending this for repair won't be easy.

My phone's manufacturing date is June 2025 for reference.

**teorm** • 2mo ago

Is charging with "Limit to 80%" worth the sacrifice? Has anybody noticed the benefits over time? Is there data?

Usually 80% is enough for me and I plan to keep my phone for long, that's why I'm doing it.

But I'm wondering if adaptive charging would be already enough to achieve 5-6 years with the phone.

**VHS_Action_86** • 2mo ago

I turn it on and off every few months and honestly haven't noticed any change that benefits it. It might just be my phone though

1 more reply

**DistanceIndividual42** • 2mo ago

This update did nothing to fix my pixel 9 pro fold. The phone will only charge to 88%. Regardless of charge to 80% optimization, it will go to 88. Then once I use it to 60%, the UI gets slow then the phone reboots. Keeps doing this. So the phone is basically useless after 60%. When I charge it, the phone will

[Skip to main content](#)[Create](#)**papadrach** • 2mo ago

Top 1% Commenter

December release is noticeably worse battery drain on my P9P. I could get through half a day with around 75 to 80% easily with slight usage. Now I'm near 60 %. Tested my S25U and was only at like 85 to 83% by half the day with moderate to light usage (2 to 3hrs).

**restockthreestock** • 2mo ago

When does the new qpr come out for Pixel 8 Pro devices? Also, any update on when quick share airdrop compatibility extends to more pixels than just the 10 series? Thanks!

**degggendorf** • 2mo ago • Edited 2mo ago

Huge wifi battery use since December update. Pixel 10 Pro battery stats, wifi is biggest user:

<https://imgur.com/a/leqLMxw>

Rebooting, resetting wifi hasn't changed anything. Any ideas?

edit: Google Play Services update yesterday seems to have cured it.

**rfgenerator** • 2mo ago

A little bit disappointed. I got my P10P at launch. Initially the Battery Capacity was at 100% now just 3 months later it's down to 98%. Most of the time I have the Charge Optimization set to "Limit to 80%", but on some occasions when I'm going to be shooting a lot of video or using the camera a lot for an extended period I'll charge it up to 100%. I never let it go under 20%. Anyhow am I wrong for thinking for the battery to lose 2% in just 3 months is a tad disappointing.

**quentin_berlemont** • 2mo ago

Depuis la mise à jour, problème de l'application bien être numérique qui cesse de fonctionner, fait planter le téléphone et le fait redémarrer. Le SAV n'avait rien trouvé en Aout pour ce même téléphone et ce même problème mais lorsqu'il m'a été résitué, ça refonctionnait .. Pourtant, j'ai fait de multiples réinitialisation d'usine, changement de carte esim vers sim, restauration avec et sans sauvegarde, sans aucune application supplémentaire..

Depuis cette MAJ, le problème recommence.. C'est vraiment n'importe quoi, des téléphones à plusieurs centaines d'euros et rien ne fonctionne correctement, des amateurs..

**jackyliam12** • 2mo ago

experience I'm not a gamer so performance doesn't concern me too much as long as I can take pics and videos of my cats and fam and listen to my music I'm set.

**ExpiredDeodorant** • 2mo ago

Amazon Pixel 10 series sale is pretty nice

\$450 for a 128gb

**Capable_Cod_6000** • 1mo ago

My 8A sustained some major screen damage and is being overtaken by purple splotches :(I had to purchase it at full-price last year when my 7A just died randomly while abroad. It was heartbreaking since it was like 2 weeks before the holiday sales kicked in. Getting a bit tired of having to replace my phone every year and can't decide between the 9A and 9. I found the A for \$400 and 9 for \$500. Is the 9 worth the extra \$100 - I know at it's original price most folks said it wasn't. I also found a refurbished 9 Pro for \$500 or a refurbished 8 Pro for \$399.. which I could be interested in. Would love any recommendations as I'd like to purchase ASAP to avoid going w/o a phone for a few days when the 8A inevitably stops working completely. Also open to case and screen protector recommendations because...I have no idea how I seem to destroy my devices so easily (I swear I try to be gentle)!

[2 more replies](#)**jritz611** • 1mo ago

Noticed something that if I put pixel 10 to wireless charge while phone is on battery saver, when I take it off at 100% the phone will be all sluggish as if it's still on but it's not indicating anything. Can be fixed with restart or toggling battery saver on/off.

Bought this charger: https://www.amazon.com/dp/B0FLN45S1S?ref=ppx_yo2ov_dt_b_fed_asin_title&th=1

**fakoff** • 2mo ago

Pixel 8 battery, drained 40 percent during sleep doing nothing after the update. Every time I unlock the phone the battery is so much lower. The battery usage says it is drained by "Mobile network".

**maxsix29** • 2mo ago

Hi Guys,

I am reading a few comments saying that on pixel 9a the battery has reduced, sometimes, noticeably, after Android upgrade (to 16 I believe).

[Skip to main content](#)[+ Create](#)

Max

[+ 1 more reply](#)**Dangerous-Top-6077** • 2mo ago

So, I'm currently on a P9 Pro. I started using beta versions some weeks after I bought the phone (June 2025), and most of the time my battery completely drained in a matter of hours (surely less than 10). To solve this problem today I opted out from the beta version to use the stable one, and yet the battery is draining very fast in a matter of hours. This is deeply disappointing, I don't know if being in the beta still influences the battery life, but it's quite difficult to work with almost no autonomy. I don't have any game on my phone, only work-related things.

**catalinashenanigans** • 2mo ago

Random question, on the stock Clock app, is there a way to customize it up so that the timer can be set by scrolling a hour, minute, and second wheel (instead of manually typing in the amount of time)? That was a feature on my old Galaxy S10e that I really liked.

If it's not, any recommended timer apps?

[+ 1 more reply](#)**Traditional_Limit236** • 2mo ago

Dec update broke a lot of my apps. Lot of weird stuff going on. Autofill passwords are broken as well. Super odd.

**marcioafo** • 2mo ago

On my Pixel 8 Pro and Pixel 8a the battery drain is really bad after the December update. It was already bad after November update but now it's really bad.

**new_handle** • 2mo ago

Just got the new Google Play system update which now says Update from 1 January 2026.

**ExpiredDeodorant** • 2mo ago

[Skip to main content](#)[Create](#)**barefootBam** • 2mo ago

so i just got my pixel 10 pro xl in the mail today and am working on the transfer. i have it next to my pixel 8 pro and the color looks...off? Like the pixel 10 pro whites look yellow and just too warm. I tried messing around with adaptive colors and settings and contrast but I can't shake the yellowish tint.

is this a known problem? is this just how the phone is or do I have a defective unit?

**ayaholley** • 2mo ago

I bought a 10 Pro about 6 weeks ago and no matter what I do, it's always had a ~15% battery drain overnight. On my old P9 it was basically negligible. The culprit in the battery usage menu is just "system apps"

**Sentimental_Oyster** • 2mo ago

Have they fixed this crap with the latest big update that dropped these days?

**ming3r** • 2mo ago

Had the pixel 10 pro for like a week, and... It's about the same as the p9 pro I had. Battery is also fine.

No real issues, \$100ish for the upgrade seems fair for the new battery.

**ephemeral_enchilada** • 2mo ago

Google replaced my 6a battery.

Now the replacement battery is heating up and rapidly discharging. Maybe it's time to just go get a refurbished Moto G and call it a day.

**Ascalion** • 2mo ago

I don't know for sure, but it feels like it coincided with the December 2025 update.

Found it shut down one morning when I was sure it was charged, so I plugged it in, and after it was full later, after unplugging it, just a few minutes later it would shut down. I tried restarting it but it would shut off again at the first google logo approximately, sometimes it's more or less a second shorter or longer, but always shuts off. It will only start again fully if plugged in.

[Skip to main content](#)[+ Create](#)

Anyone else seeing something like this happen to them too?

1 more reply

Dekita1 • 2mo ago

Google Pixel 10 or 9 Pro

Hey guys,

I am looking to get my first Google Pixel phone. And was wondering if I should get the 9 Pro (I found a blue one used 6 months with 256gb with a good price), or a new 9 Pro with 128gb, or a 10 128gb.

Or should I go all out for the 10 Pro, it's a kind of out of my budget range. Is it THAT better than the 10 and 9 Pro?

Tell me what you think the best option is!

Thanks guys!

_maezing • 2mo ago

My online Synchrony account says 34.99% APR, my paperwork says 0% APR for phone purchases and 34.99% for everything else. The live chat agent says to ignore it and that it's 0% for both transactions (which doesn't make sense because I purchased a screen protector and that should have interest). Does anyone else have experience with this?

Toastbuns • 2mo ago

Is it worth upgrading from a Pixel 9 Pro to a Pixel 10 Pro if the out of pocket cost to me is just \$99?

Feels like there are no significant changes and might not be worth the hassle. In fact the wireless charging rate has gotten worse.

On the other hand, a fresh battery and a new screen are always nice, along with some marginal improvements to the processor.

white-christmas • 2mo ago

if you use Gemini alot the year of pro value too. I think the fresh battery and new screen alone justify 100

lauraotms • 2mo ago

[Skip to main content](#)[+ Create](#)

Anyway I filed for compensation with Google via the online form and when I filled in my IMEI code I got the option to get a hundred Euros cash back and I can't remember what it said in the last step, but I recall something like a reply within three weeks or something and having to make a Payoneer account. Unfortunately I didn't make a screenshot of it and I haven't received any confirmation in my email about filling in the form. If I try to fill it in again it says it's not eligible but it was the first time I did it so I'm wondering will I get a confirmation within like three weeks or did others get their confirmation instantly?

**Oceanwavees03** • 2mo ago

Owner of a 23U for almost 3 years now, and thinking of upgrading for the following reasons:

- battery longevity noticeably not as good as when I first owned the phone, especially when using camera app alot on trips. I have a trip coming up to Europe in a few months and would like a phone that I can last a day that won't completely drain the battery from just taking photos.

- I like taking pictures of food at restaurant under different lighting conditions, but some of the pics on my 23U look oversaturated?/overprocessed?

- I like listening to YT podcast while in shower, and sometimes the 23U speaker just aren't loud enough with background showering going on.

There is a holiday sale going on at Google store and with a trade-in, the final price of the pixel 10 pro seemed to be at a reasonable price. Will a switch to Pixel 10 pro address some of the problems I have above? Or wise to wait for 26U or Pixel 11 series? I have never owned a Pixel before but uses a lot of the Google stuff on my Samsung, so anything I should be aware before making the switch?

As a side note, I love to use AI to help with calls (which I think Pixel also have). I also don't plan to play games on my phone anytime soon.

**Chrisnewton1** • 2mo ago

Have a base pixel 10 and have always used the 80 percent charging option.

It's done only 30 cycles and yesterday the capacity showed 100 percent. However today it's dropped to 96 percent.

Just how accurate is the estimation?

**TheUndertaker1988** • 1mo ago

I have Pixel 9 Pro. Idle/sleep battery drain is excessive. I'm losing 1% every hour on idle/sleep. I'm on the latest Android 16 December update. Anyone else has this issue and is there a fix?

[1 more reply](#)

Create

had any issue with battery life before, however today, I just noticed that it was on 89% or something similar, I haven't been using it much today, and then I go back and it's dropped to 64% despite the fact that i've not done anything.

Apparently this is such a problem for people that it needs to be made into a Megathread?

4 more replies

VelenWarrior • 1mo ago

Today my mother's phone, a pixel 7a showed signs of battery swelling, I did some research online and found out that is a known issue and google has a replacement or reimbursement program, since I'm in Italy and not in a replacement possible country they said that a certain amount of money will be given as reimbursement, how does that work? It says that in 3 weeks someone from the team will contact me, does that happen over phone or is it an email?

Anyone got more info on this

haydgateley • 1mo ago

Coming from a 17 Pro Max and not sure if the battery is much different between them. Better battery, better speakers, faster charging are all welcome but are they minuscule improvements? The smaller form would be ideal but having the best to offer could be worth the inconvenient size

haydgateley • 1mo ago

Is there much of a battery difference between 10 Pro and 10 Pro XL?
